SCORING

The table below provides the r and b coefficients values for a given task, where r stands for the points obtained for the correct answer and b stands for points for the quality of a solution (see "The Eliminations Rules"). The number of sets of data for each task is also given in the table.

Task	r	b	n	$r \cdot n$	$b \cdot n$	Max. Sum
Flood	25	10	10	250	100	350
Packs	60	30	10	600	300	900
Interrogation	15	90	10	150	900	1050
Help	20	90	10	200	900	1100

- r and b — coefficients used to calculate the number of points

- n — the number of sets of data
